

Teaching, Learning, and Doing Math Online Just Got Easier

Maple Learn™ is a dynamic online environment designed specifically for teaching and learning math and solving math problems. Maple Learn, an online version of the powerful math software Maple™, is focused on the needs of educators and students in high school, community and two year colleges, and the first two years of university.

Features

- Solve problems all at once OR step-by-step
- Do lots of math
- Graph problems and results
- Parameterize expressions
- Make full use of the page
- Create worksheets to share with students
- Bring your problem into Maple Learn with a click of your camera
- Ask for help
- Available in 9 languages

For Instructors

Whether you are teaching remotely or in a classroom, Maple Learn provides an engaging environment that helps your students learn math.

- **Show exactly the level of detail you want in a calculation**, by working through problems using a combination of manual steps and computations performed by Maple Learn
- **Provide illuminating graphs, computations, explanations**, and interactive explorations all together in a single online document
- **Parameterize expressions at the click of a button** for explorations of concepts
- **Easily share documents and applications with your class** to explore on their own

Instructors can apply for a **free Maple Learn Premium account!**

For Students

Much more than just a sophisticated graphing calculator, Maple Learn is a great tool to help you understand concepts and succeed in your courses.

- **Solve problems instantly, or work them out line-by-line** as you would in your notebook.
- **Check individual steps** as well as the final result
- **Perform side calculations** that don't interrupt the flow of your main problem
- **Deepen your understanding** with graphs that change instantly as you modify the expression
- **Easily share your work** with your teacher, tutor, or classmates when asking for help

And because Maple Learn is an online version of Maple, you can also open, view, and interact with a wealth of existing Maple worksheets and Math Apps!
